Highly motivated and passionate and expertise in developing web applications with more than 9 years' experience in both full stack and backend engineer role. Experience in designing, developing, testing, and deploying web applications, web APIs using Agile methodologies. Adept at collaborating with cross-functional teams and delivering high-quality code on time. Would like to work in an organization that provides a competitive, challenging working environment and good prospects to improve new skills and knowledge to the best level. According to my past experiences, I would like to apply my skill set and knowledge to challenging projects. I also want to develop systems using the latest technologies and a professional environment.

- Designed and developed RESTful APIs, Web Application using React.js, .NET Core and C#.
- Worked on implementing and docker to improve application performance and scalability.
- Design and implement database schema using entity framework core and Microsoft SQL Server using temporal table for versioning.
- Worked implementing authentication and authorization using OAuth, JWT token and Microsoft login.
- Troubleshoot and resolve application defects and performance issues.

EDUCATION
University Of Computer Studies, Taungngu   September 2011
Bachelor of Computer Science

Graduated Bachelor of Computer Science (B.C.Sc., B.C.Sc. (Hons:)) from University of Computer Studies, Taungngu (UCST), Myanmar in September 2011.

CERTIFICATIONS
Microsoft Certified: Power Platform Fundamentals   November 2024
Microsoft Power Platform Functional Consultant   December 2024

TECHNICAL SKILLS
- Programming Language: C#
- Front-End: HTML, CSS, Bootstrap, JavaScript, jQuery, Ajax, React.js
- Web Services Technology: WCF, Restful API

- Database: Microsoft SQL Server, MySQL, Oracle, PostgreSQL
- Hosting Server: Windows Server
- Source Control: Bitbucket, GitHub, Subversion, Azure DevOps
- OS: Windows
- API Documentation: Swagger
- Low Code/No Code Platform: Power Platform
- API Management Platforms: Apigee Edge
- Cloud Platforms: AWS Cloud
- CICD Tools: GitHub workflow and action, Jenkins, GitLab
- Project Management Tools: Jira

LANGUAGES

English (Intermediate) (Full professional proficiency), **Burmese** (Native)

INTERPERSONAL SKILLS

- Able to communicate effectively with various cultural and multi-generation team members, clients and stakeholders and able work collaboratively with others by sharing ideas and working towards a common goal with positive attitude and flexibility.

STRENGTH

- adapt to changes and get up to date with the latest technologies quickly.
- creative and innovative when comes to problem-solving and finding new ways to develop software.
- find and fix any issues in the code thoroughly and efficiently.
- manage time effectively and prioritize tasks to meet project deadlines.

CAREERS PATH

I have graduated since 2011 and I started IT career as web developer from 2014 Myanmar High Society (on site, one of famous and elder software house in Myanmar), KBZ Bank (on site, one the biggest banking company in Myanmar), Tokiomarine Co. Ltd. (remote job, Singapore based Company was founded by D3-SG Pte. Ltd. Singapore) in Myanmar and current job FPT Software (on site, one the biggest outsourcing company in Vietnam). I want to growth my professional career life and look for new job opportunities. I want to challenge new responsibilities and technologies in a new onsite working environment. And, I want to make a challenge to change the career to Low Code, No Code platform like Power Platform if there is a chance to me.
